### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 2-10, the prior art fails to teach for use in a wireless telecommunication system comprising a base station and a plurality of mobile stations, a method for selecting a best fit transport format combination (TFC) from a transport format combination set that is assigned to at least one mobile station by said base station, said method comprising the steps of: identifying TFC candidates in said transport format combination set that are not best fit candidates; deleting from said transport format combination set said TFC candidates that are not best fit candidates until a sole TFC candidate remains; identifying said sole remaining TFC candidate as a best fit TFC candidate; "iteratively applying at least one set reduction constraint to said transport format combination set; and deleting TFC candidates from said transport format combination set that do not meet said at least one set reduction constraint," in combination with other limitations, as specified as, in the independent claim 2.

Regarding claims 11–16, the prior art fails to teach for use in a wireless telecommunication system comprising a base station and a plurality of mobile stations, a method for selecting a best fit transport format combination (TFC) from a transport format combination set that is assigned to at least one mobile station by said base station, said method comprising the steps of: applying an iterative TFC selection algorithm to said transport format combination set to identify TFC candidates that are not best fit candidates; deleting from said transport format combination set said TFC candidates that are not best fit candidates until a sole TFC candidate remains; identifying said sole remaining TFC candidate as a best fit TFC candidate; “iteratively applying at least one set reduction constraint to said transport format combination set; and deleting TFC candidates from said transport formation combination set that do not meet said at least one set reduction constraint,” in combination with other limitations, as specified as, in the independent claim 11.

Regarding claims 17–20, the prior art fails to teach for use in a wireless telecommunication system comprising a base station and a plurality of mobile stations, user equipment that is capable of selecting a best fit transport format

combination (TFC) from a transport format combination set that is assigned to at least one mobile station by said base station, wherein said user equipment comprises: a protocol stack that identifies TFC candidates in said transport format combination set that are not best fit candidates; wherein said protocol stack deletes from said transport format combination set said TFC candidates that are not best fit candidates until a sole TFC candidate remains; wherein said protocol stack identifies said sole remaining TFC candidate as a best fit TFC candidate; wherein “said protocol stack iteratively applies at least one set reduction constraint to said transport format combination set; and wherein said protocol stack deletes TFC candidates from said transport format combination set that do not meet said at least one set reduction constraint,” in combination with other limitations, as specified as, in the independent claim 17.

Regarding claims 21–26, the prior art fails to teach for use in a wireless telecommunication system comprising a base station and a plurality of mobile stations, a method for minimizing a search time for selecting a best fit transport format combination (TFC) from a transport format combination set

that is assigned to at least one mobile station by said base station, said method comprising the steps of: applying an iterative TFC selection algorithm to said transport format combination set to identify a TFC candidate that is a best fit candidate in said transport format combination set; iteratively reducing a size of said transport format combination set to a smaller size; iteratively searching said smaller size of said transport format combination set to identify best fit TFC candidates; “iteratively applying at least one set reduction constraint to said transport format combination set; and deleting TFC candidates from said transport formation combination set that to do not meet said at least one set reduction constraint,” in combination with other limitations, as specified as, in the independent claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
